## Development Committee

*The mission of the USJA's Development Committee is to build stronger communities and better people through the discipline, physical conditioning, focus and ethical values learned in judo. Goals and activities of the USJA development program are aimed at making these quality programs available throughout America.*

**This program is built for the true needs of judo in the United States by being able to adapt and adjust. The USJA has a wide variety of judo clubs spread out all over the country and we need to be able to reach out to those that need assistance. Not just financial assistance but any assistance that will help promote the core values of judo and the USJA; 'improving people's character and giving back to society.' The first question is 'what do our clubs and their students need help with?'**

**If you are a USJA club leader or student of a USJA club with ideas on what could help you with your judo program or your personal judo development please email us and let us know. We also are asking club leaders, tournament hosts, and everyone to please donate to the USJA's Development Fund. We look forward to working with you on and hope to make a positive difference.**
